Good Afternoon,

We had the bid opening for PHE this afternoon, and the bid came in slightly over budget for one unit. As you are aware, the other two units at PHE are dead. Richard, Brian, and Dwayne worked three days last week trying to get the units running with no luck. I canceled school on Thursday due to the high temperatures in the classroom. Is there any way we can get emergency funding to fund the additional amount needed. I have attached the bid sheets for your review. We plan to request additional money as a MIP to fix the rest of the units they have all exceeded their life expectancy. I appreciate your help and consideration. Thanks, Kelli
